Interface Newsletter

Spring 2015

Too many charts?
Just lost track of how many charts you are running? Need some help maintaining them and picking up exceptions, or don't have enough time to master Excel? Try our AqcTools software application instead. It's designed for laboratories that need to meet ISO 17025 accreditation and needn't cost the earth.

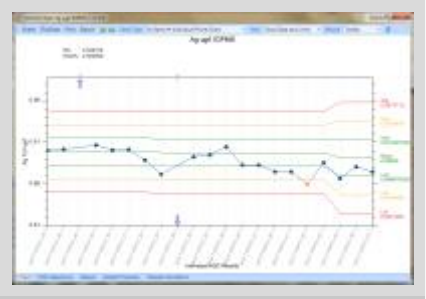
Getting extra instrument productivity
We're often surprised by the amount of manual administration that analysts perform per instrument run.

Our Links for LIMS software can automate all the results calculations and interpretations that you are



Method & Instrument Validation

To compliment AqcTools we are planning to develop a utility to help validate methods and instruments. If you would like to be involved in this project then please email: validate@csols.com

routinely doing per sample or per run sequence, even if you don't have a LIMS. We continue to expand the number of instruments we work with.

Let us know which instruments you find tough to work with and we can show you what we can do.

Radio Frequency Identification (RFID)

Tags causing a storm

Ever wondered if the RFID technology used on the high street might make it into the lab? Well we're already helping label and track samples and reagents with UHF RFID based labels. There's lots of applications. Interested? Just give us a call or click on RFTrackIT.

2015 Activities

We hope you found our first newsletter of 2015 interesting. Please contact us if you think we can improve your productivity by removing some of your bottlenecks. Our contact details are given below. We are also attending and organising the following events. Hope to see you there.

European Winter Plasma Conference March 22nd-27th.

Thermo Fisher Clinical/Toxicology Seminar London March 19th

CSols AqcTools AQC Forum & workshops - May 12th, 13th & 14th Venues to be announced. For further information please email aqctools@csols.com
